

STANDARD OPERATING PROCEDURES

AI-HRMS User SOP

Comprehensive Procedures for All 9 Modules

This document provides step-by-step user procedures for the AI-powered Human Resource Management System, covering Core HR, Talent Acquisition, Time & Attendance, Payroll, Performance, Learning & Development, Analytics, and Security modules.

Version 1.0

1. Introduction

1.1 Purpose of the SOP

This Standard Operating Procedure (SOP) document provides comprehensive, step-by-step instructions for end users of the AI-HRMS (Artificial Intelligence - Human Resource Management System). The purpose is to ensure consistent, efficient, and error-free operation of all system modules across the organization. By following these procedures, users can maximize productivity while maintaining data integrity and compliance with organizational policies.

1.2 Scope and Audience

This SOP covers all user-facing procedures for the 9 core modules of the AI-HRMS platform. The intended audience includes:

- Super Administrators and HR Administrators
- Department Managers and Team Leads
- Employees (all roles)
- Recruiters and Talent Acquisition Specialists
- Learning & Development Managers
- Payroll Specialists and Finance Personnel

Technical administration, server configuration, and developer APIs are outside the scope of this document and are covered separately in the Technical Documentation.

1.3 System Overview

AI-HRMS is an enterprise-grade, AI-powered Human Resource Management System designed to streamline HR operations through intelligent automation. The system comprises 9 integrated modules:

#	Module	Primary Function
1	Core HR & Employee Management	Employee lifecycle, directory, org chart
2	RBAC & Security System	Role-based access, audit trails, encryption
3	AI-Driven Talent Acquisition & Onboarding	Recruitment pipeline, AI matching
4	Time & Attendance Management	Attendance, leave, shifts, holidays
5	Payroll & Expense Management	Salary processing, expenses, tax
6	Performance & Talent Development	OKRs, reviews, attrition prediction
7	Learning & Development	Courses, skills, certifications

8	Analytics & Reporting	Dashboards, forecasts, custom reports
9	Employee Self-Service & Collaboration	Self-service, chatbot, policies

1.4 How to Use This Document

This document is organized by module. Each section contains numbered step-by-step procedures for common tasks. Use the Table of Contents to navigate directly to the procedure you need. Notes and tips are provided in highlighted boxes. Role-specific procedures are consolidated in Section 12 for quick reference.

2. Getting Started

2.1 Accessing the System

To access the AI-HRMS application:

Step 1: Open a supported web browser (Google Chrome 90+, Microsoft Edge 90+, or Firefox 88+).

Step 2: Navigate to the AI-HRMS URL provided by your IT department (e.g., <https://hrms.yourcompany.com>).

Step 3: Ensure your browser allows pop-ups and JavaScript for full functionality.

Note: Mobile access is available via responsive web design. For the best experience, use a desktop browser with a minimum resolution of 1280 x 720 pixels.

2.2 Login Procedure

Step 1: On the AI-HRMS login page, enter your corporate email address in the Username field.

Step 2: Enter your password in the Password field. Passwords are case-sensitive.

Step 3: If Multi-Factor Authentication (MFA) is enabled, enter the 6-digit code from your authenticator app.

Step 4: Click the "Sign In" button.

Step 5: On first login, you will be prompted to change your temporary password and set up security questions.

Note: After 5 consecutive failed login attempts, your account will be locked for 30 minutes. Contact IT support if you cannot access your account.

2.3 Navigation Overview

The AI-HRMS interface consists of two primary navigation elements:

Sidebar Navigation

The collapsible sidebar on the left side of the screen provides access to all 9 modules. Click any module name to expand its sub-menu and access specific features. The sidebar can be collapsed to icon-only mode by clicking the hamburger icon at the top.

Header Bar

The top header bar contains: your profile avatar and name (top-right), a global search bar, notification bell with badge count, and a quick-actions dropdown for frequently used tasks.

2.4 Dashboard Overview

After login, you are presented with the main dashboard featuring:

- **KPI Cards:** Quick-glance metrics such as total employees, pending approvals, open positions, and attendance rate.
- **Charts:** Interactive charts showing headcount trends, department distribution, and attrition rates.
- **Quick Actions:** One-click buttons for common tasks like "Apply Leave," "Submit Expense," or "View Payslip."
- **Pending Approvals:** A list of items awaiting your action (visible to managers and HR admins).
- **Announcements:** Company-wide and department-specific announcements from HR.

3. Core HR & Employee Management

3.1 Viewing Employee Directory

Step 1: From the sidebar, click "Core HR" then "Employee Directory."

Step 2: The directory displays all employees you have permission to view in a sortable, filterable table.

Step 3: Use the search bar to find employees by name, employee ID, or department.

Step 4: Apply filters using the filter panel: Department, Status, Location, or Designation.

Step 5: Click on any employee row to view their detailed profile.

Note: The information visible in the directory depends on your role and the data masking policies configured by your administrator.

3.2 Adding a New Employee

This procedure is available to HR Admins and Super Admins only.

Step 1: Navigate to Core HR > Employee Directory.

Step 2: Click the "Add Employee" button in the top-right corner.

Step 3: Fill in the mandatory fields in the Personal Information section: First Name, Last Name, Date of Birth, Gender, and Contact Number.

Step 4: Complete the Employment Details section: Employee ID, Department, Designation, Joining Date, and Employment Type.

Step 5: Upload a profile photo (optional, JPEG/PNG, max 2 MB).

Step 6: Enter Compensation details: Basic Salary, HRA, DA, and other components.

Step 7: Assign a Role from the RBAC dropdown (default: Employee).

Step 8: Click "Save" to create the employee record. The system will auto-generate login credentials and send them to the employee email.

Note: If the AI onboarding module is active, a new-hire onboarding checklist will be automatically created upon saving.

3.3 Editing Employee Information

Step 1: Navigate to the employee profile (Core HR > Employee Directory > click employee name).

Step 2: Click the "Edit" button (pencil icon) on the relevant section.

Step 3: Modify the required fields.

Step 4: Click "Save" to apply changes. All edits are recorded in the audit trail.

3.4 Viewing Employee Details

The employee detail page provides a comprehensive view organized into tabs:

- **Profile:** Personal information, contact details, emergency contacts.
- **Documents:** Uploaded documents with access level indicators.
- **Assets:** Company assets assigned to the employee.
- **History:** Employment history, status changes, and transfer records.
- **Compensation:** Current salary structure and revision history.

3.5 Managing Employee Documents

Step 1: Open the employee profile and click the "Documents" tab.

Step 2: Click "Upload Document" to add a new document.

Step 3: Select the document type from the dropdown (e.g., ID Proof, Offer Letter, Certificate).

Step 4: Choose the file from your device (PDF, JPEG, PNG; max 10 MB per file).

Step 5: Set the Access Level: "Public" (visible to the employee and HR), "Confidential" (HR and manager only), or "Restricted" (HR admin only).

Step 6: Click "Upload" to save the document.

3.6 Asset Assignment and Tracking

Step 1: Navigate to Core HR > Asset Management.

Step 2: Click "Assign Asset" to issue a new asset.

Step 3: Select the employee and the asset from the inventory.

Step 4: Enter the assignment date and expected return date (if applicable).

Step 5: Click "Assign." The asset status changes from "Available" to "Assigned."

Step 6: To return an asset, select the asset record and click "Return Asset." The status reverts to "Available."

3.7 Employee Status Changes

Employee status transitions in AI-HRMS follow a defined lifecycle:

Status	Description	Trigger
Onboarding	New hire completing setup	Employee created in system
Active	Fully onboarded and working	Onboarding checklist completed
On Leave	Temporarily absent	Leave request approved
Inactive	Not currently active	Manual status change by HR
Exited	No longer with organization	Exit process completed

3.8 Org Chart Navigation

Step 1: Navigate to Core HR > Org Chart.

Step 2: The interactive org chart displays the reporting hierarchy starting from the top-level executive.

Step 3: Click on any node to expand or collapse subordinates.

Step 4: Use the zoom controls (+ / -) to adjust the view level.

Step 5: Click on an employee card to view their profile in a side panel.

Step 6: Use the search bar within the org chart to locate a specific employee and highlight their position in the hierarchy.

4. RBAC & Security System

4.1 Understanding Role-Based Access

AI-HRMS implements Role-Based Access Control (RBAC) to ensure users can only access features and data relevant to their role. Each role has a defined set of permissions that govern read, write, approve, and administrative actions across all modules.

The default roles in the system are:

- **Super Admin:** Full system access, including user management and system configuration.
- **HR Admin:** Access to all HR modules, employee data, and approval workflows.
- **Department Manager:** Access to team data, approvals, and performance reviews.
- **Employee:** Self-service features, personal data, leave, and expense submission.
- **Recruiter:** Talent acquisition module, candidate pipeline, and interview scheduling.
- **L&D Manager:** Learning & Development module, course management, and skill tracking.
- **Payroll Specialist:** Payroll processing, salary structures, and tax configuration.

4.2 Permission Matrix Overview

The permission matrix defines granular access rights for each role across modules. To view the permission matrix:

Step 1: Navigate to Security > Permission Matrix.

Step 2: Select a role from the dropdown to view its permissions across all modules.

Step 3: Permissions are displayed as: Read (R), Write (W), Approve (A), Admin (X).

Step 4: To modify permissions (Super Admin only), click "Edit Matrix," adjust the checkboxes, and click "Save."

Note: Changes to the permission matrix take effect immediately upon saving. Users currently logged in will see updated access on their next page navigation.

4.3 Viewing Audit Trails

Step 1: Navigate to Security > Audit Trails.

Step 2: The audit log displays all system actions with: Timestamp, User, Action Type, Module, and Details.

Step 3: Use date range filters to narrow results.

Step 4: Filter by user, module, or action type for targeted searches.

Step 5: Click "Export" to download the audit trail as a CSV or PDF report.

4.4 Data Masking Features

AI-HRMS supports field-level data masking to protect sensitive employee information. Fields such as Social Security Numbers, bank account details, and salary information are automatically masked based on role permissions. Masked data appears as partial values (e.g., XXX-XX-1234 for SSN). Only users with explicit "Unmask" permission can view the full data by clicking the reveal icon next to the masked field.

4.5 Encryption Status Monitoring

Step 1: Navigate to Security > Encryption Status.

Step 2: The dashboard shows encryption coverage across data categories: At Rest, In Transit, and Database Backups.

Step 3: A green indicator means encryption is active; yellow indicates partial coverage; red signals an issue.

Step 4: Click on any category for detailed encryption algorithm and key rotation information.

4.6 Approval Workflow Management

Multi-level approval workflows can be configured for actions such as leave requests, expense claims, and policy changes. To configure an approval workflow (HR Admin only):

Step 1: Navigate to Security > Approval Workflows.

Step 2: Click "Create Workflow" or select an existing workflow to edit.

Step 3: Define the trigger event (e.g., "Leave Request Submitted").

Step 4: Add approval levels: Level 1 (e.g., Direct Manager), Level 2 (e.g., HR Admin).

Step 5: Set auto-escalation rules: if not acted upon within X hours, escalate to next level.

Step 6: Click "Save and Activate" to enable the workflow.

5. AI-Driven Talent Acquisition & Onboarding

5.1 Creating Job Postings

Step 1: Navigate to Talent Acquisition > Job Postings.

Step 2: Click "Create New Posting."

Step 3: Fill in the job details: Title, Department, Location, Employment Type, and Experience Required.

Step 4: Enter the Job Description in the rich text editor. Use the "AI Assist" button to auto-generate a JD based on similar roles in the system.

Step 5: Define required skills and competencies. The AI will use these for candidate matching.

Step 6: Set the salary range and application deadline.

Step 7: Click "Publish" to make the posting live on internal and external job boards.

5.2 Managing Candidate Pipeline (Kanban Board)

Step 1: Navigate to Talent Acquisition > Candidate Pipeline.

Step 2: The Kanban board displays candidates organized by stage: Applied, Screened, Interview, Offer, and Hired.

Step 3: Drag and drop candidate cards between columns to move them through stages.

Step 4: Click on a candidate card to view their full profile, resume, and AI-generated assessment.

Step 5: Use the filter bar to sort by job posting, AI Fit Score range, or date applied.

5.3 AI Fit Score Interpretation

The AI Fit Score is a machine-learning-generated metric (0-100) that indicates how well a candidate matches the job requirements. The scoring breakdown is:

Score Range	Rating	Recommended Action
85 - 100	Excellent Fit	Fast-track to interview
70 - 84	Strong Fit	Schedule interview promptly
50 - 69	Moderate Fit	Review manually; consider for interview
30 - 49	Weak Fit	May not meet requirements; review if needed
0 - 29	Poor Fit	Auto-reject or archive candidate

Note: The AI Fit Score considers skills match, experience relevance, education, and cultural fit indicators. It is a recommendation tool and should be used alongside human judgment.

5.4 Scheduling Interviews

Step 1: Open the candidate profile from the pipeline.

Step 2: Click "Schedule Interview."

Step 3: Select the interview type: Phone Screen, Technical, Behavioral, or Final Panel.

Step 4: Choose the interviewers from the team member list.

Step 5: Select the date and time. The system will check interviewer availability and suggest open slots.

Step 6: Add interview notes or a brief for the interviewers.

Step 7: Click "Send Invitation." Calendar invites are automatically sent to all participants.

5.5 Moving Candidates Through Stages

Candidates can be moved through stages via:

- **Drag and Drop:** On the Kanban board, drag the candidate card to the next stage column.
- **Candidate Profile:** Open the candidate profile, click "Advance Stage," and select the target stage.
- **Bulk Action:** Select multiple candidates using checkboxes, then click "Bulk Advance" and choose the stage.

Each stage transition is logged with a timestamp and the user who performed the action. Rejection actions require a mandatory reason to be entered.

5.6 Onboarding Checklist Management

Step 1: When a candidate is moved to "Hired," the system auto-generates an onboarding checklist.

Step 2: Navigate to Talent Acquisition > Onboarding to view all active onboarding tasks.

Step 3: The checklist includes items such as: Document verification, IT account setup, Asset assignment, Policy acknowledgment, and Team introduction.

Step 4: HR Admins can add or remove checklist items by clicking "Edit Checklist Template."

Step 5: Assign each checklist item to a responsible person with a due date.

Step 6: Track completion status in real-time. Items turn green when completed.

5.7 AI-Powered Candidate Matching

When a new job posting is published, the AI engine automatically scans existing candidate profiles in the talent pool and identifies potential matches. To review AI-suggested candidates:

Step 1: Open the job posting and click the "AI Matches" tab.

Step 2: Review the list of suggested candidates ranked by Fit Score.

Step 3: Click "Invite to Apply" to send an application invitation to any suggested candidate.

Step 4: The AI also sends passive candidate alerts when profiles matching your open roles are added to the system.

6. Time & Attendance Management

6.1 Checking Attendance Records

Step 1: Navigate to Time & Attendance > My Attendance.

Step 2: The calendar view shows your attendance for the current month: present (green), absent (red), leave (yellow), and holiday (blue).

Step 3: Switch to the "List View" tab for a tabular breakdown by date.

Step 4: Use the date picker to view attendance for previous months.

Step 5: Managers can view team attendance under Time & Attendance > Team Attendance.

6.2 Marking Attendance (Check-In / Check-Out)

Step 1: On the dashboard, click the "Check In" button (or navigate to Time & Attendance > Mark Attendance).

Step 2: If geofencing is enabled, ensure you are within the designated office geofence. The system will verify your location automatically.

Step 3: If biometric integration is active, the system syncs check-in data from the biometric device.

Step 4: At the end of the day, click "Check Out." The system calculates total working hours.

Note: If you forget to check out, you can submit a regularisation request the next day via Time & Attendance > Regularisation.

6.3 Applying for Leave

Step 1: Navigate to Time & Attendance > Apply Leave.

Step 2: Select the Leave Type from the dropdown: Casual Leave, Sick Leave, Earned Leave, or Compensatory Off.

Step 3: Select the Start Date and End Date. For half-day leave, check the "Half Day" option.

Step 4: Enter the Reason for the leave.

Step 5: If attaching a medical certificate (required for Sick Leave > 2 days), click "Attach Document" and upload the file.

Step 6: Click "Submit." The leave request is sent to your reporting manager for approval.

Step 7: You will receive an email and in-app notification upon approval or rejection.

6.4 Leave Approval Process (For Managers)

Step 1: Navigate to Time & Attendance > Leave Approvals.

Step 2: Review the list of pending leave requests from your team.

Step 3: Click on a request to view details: leave type, dates, reason, and team leave calendar.

Step 4: Click "Approve" or "Reject." If rejecting, enter a mandatory reason.

Step 5: The employee is notified immediately of the decision.

6.5 Viewing Leave Balance

Step 1: Navigate to Time & Attendance > Leave Balance.

Step 2: The leave balance dashboard shows: Total allotted, Used, Pending, and Available days for each leave type.

Step 3: The balance updates in real-time when leave is approved or rejected.

Note: Leave carry-forward rules are configured by HR Admin. Any unused leave at year-end is handled per company policy.

6.6 Shift Management

Shift management is available to HR Admins and Department Managers:

Step 1: Navigate to Time & Attendance > Shift Management.

Step 2: Click "Create Shift" to define a new shift: Name, Start Time, End Time, Grace Period, and Break Duration.

Step 3: Assign employees to shifts individually or in bulk.

Step 4: Use "Shift Rotation" to set up rotating shift schedules with automatic reassignment.

Step 5: The shift calendar provides a visual overview of all assigned shifts for the month.

6.7 Geofencing and Biometric Integration

AI-HRMS supports geofencing and biometric integration for attendance verification. When geofencing is enabled, employees must be within the defined geographic perimeter to check in. Biometric devices (fingerprint, facial recognition) sync attendance data in real-time with the system. These settings are configured by HR Admins under Time & Attendance > Attendance Settings.

6.8 Holiday Calendar

Step 1: Navigate to Time & Attendance > Holiday Calendar.

Step 2: The calendar displays company-declared holidays for the current year.

Step 3: HR Admins can add, edit, or remove holidays by clicking the date and entering the holiday details.

Step 4: Holidays are automatically factored into leave calculations and payroll processing.

7. Payroll & Expense Management

7.1 Viewing Salary Slips

Step 1: Navigate to Payroll > My Salary Slips.

Step 2: Select the month/year from the dropdown.

Step 3: Click "View Slip" to see the detailed salary breakdown.

Step 4: Click "Download PDF" to save a copy of the salary slip.

7.2 Understanding Salary Breakdown

The salary slip in AI-HRMS provides a comprehensive breakdown:

Component	Category	Description
Basic Salary	Earnings	Fixed base pay (typically 40-50% of CTC)
House Rent Allowance (HRA)	Earnings	Tax-optimized housing component
Dearness Allowance (DA)	Earnings	Cost of living adjustment
Special Allowance	Earnings	Balancing component in CTC structure
Provident Fund (PF)	Deductions	Employee contribution (12% of basic)
Professional Tax	Deductions	State-mandated tax
TDS	Deductions	Tax Deducted at Source per income slab
ESI	Deductions	Employee State Insurance (if applicable)

7.3 Processing Payroll (For HR / Payroll Admin)

Step 1: Navigate to Payroll > Run Payroll.

Step 2: Select the payroll period (month and year).

Step 3: Review the employee list and verify attendance and leave data are synced.

Step 4: The system calculates gross pay, deductions, and net pay automatically.

Step 5: Review any flagged items (e.g., new joiners, exit settlements, arrears).

Step 6: Click "Process Payroll." The system generates salary slips and bank payment files.

Step 7: Click "Confirm and Disburse" to finalize. Salary slips become visible to employees.

Note: Payroll can be run in "Draft" mode first for review before final disbursement. Once confirmed, changes require a supplementary payroll run.

7.4 Submitting Expense Claims

Step 1: Navigate to Payroll > Submit Expense.

Step 2: Click "New Claim."

Step 3: Select the Expense Category: Travel, Meals, Equipment, Training, or Other.

Step 4: Enter the amount and date of expense.

Step 5: Upload the receipt or supporting document (PDF, JPEG; max 5 MB).

Step 6: Add a description or notes.

Step 7: Click "Submit for Approval." The claim is routed to your manager.

7.5 Expense Approval Workflow

Step 1: Managers receive a notification for pending expense claims.

Step 2: Navigate to Payroll > Expense Approvals.

Step 3: Review the claim details and attached receipts.

Step 4: Click "Approve," "Reject" (with mandatory reason), or "Request More Info."

Step 5: Approved claims are forwarded to Finance for reimbursement processing.

Step 6: Finance marks the claim as "Disbursed" after payment is made.

7.6 Tax Declaration

Step 1: Navigate to Payroll > Tax Declaration.

Step 2: Select the financial year.

Step 3: Enter your investment declarations under relevant sections (e.g., Section 80C, 80D, HRA exemption).

Step 4: Upload supporting documents for each declaration.

Step 5: Click "Submit." The system recalculates your projected TDS based on declared investments.

7.7 Payroll Reports

Available payroll reports include:

- **Monthly Payroll Summary:** Total payout, department-wise breakdown, and statutory deductions.
- **Salary Register:** Detailed employee-wise salary data for the selected period.
- **Statutory Compliance Report:** PF, ESI, and TDS compliance data for filing.
- **Bank Payment File:** Formatted file for bulk salary disbursement through the bank.

8. Performance & Talent Development

8.1 Setting OKRs (Objectives & Key Results)

Step 1: Navigate to Performance > My OKRs.

Step 2: Click "Create Objective."

Step 3: Enter the Objective title and description.

Step 4: Add 2-5 Key Results with measurable targets (e.g., "Increase customer satisfaction score from 75% to 85%").

Step 5: Set the alignment (link to a parent objective if cascading from team/department OKRs).

Step 6: Set the timeline (quarterly or annual).

Step 7: Click "Submit for Approval." Your manager reviews and approves the OKRs.

8.2 Self-Review Submission

Step 1: Navigate to Performance > My Reviews.

Step 2: Click "Start Self-Review" for the current review cycle.

Step 3: Rate yourself on each competency and OKR (1-5 scale).

Step 4: Write qualitative comments for each rating.

Step 5: Review AI-generated reflection questions and answer any that apply.

Step 6: Click "Submit Self-Review." The review is forwarded to your manager.

8.3 Peer Feedback

Step 1: During an active review cycle, navigate to Performance > Peer Feedback.

Step 2: The system may suggest peers based on project collaboration. You can also add peers manually.

Step 3: Click "Provide Feedback" next to a peer name.

Step 4: Rate the peer on shared competencies and provide written feedback.

Step 5: Click "Submit." Feedback is anonymous and aggregated in the review report.

8.4 Manager Review Process

Step 1: Navigate to Performance > Team Reviews.

Step 2: Select an employee from your team to review.

Step 3: Review the employee self-assessment, peer feedback (aggregated), and OKR progress.

Step 4: Provide your rating (1-5) for each competency and overall performance.

Step 5: Write development recommendations and career growth suggestions.

Step 6: Click "Submit Review." The employee can view the review and acknowledge it.

8.5 AI-Generated Review Questions

During the review process, the AI engine analyzes the employee role, past reviews, and project history to generate contextual review questions. These questions appear in the self-review and manager review forms as "AI-Suggested Questions." Reviewers can choose to answer or dismiss these questions. The AI

adapts its suggestions based on the employee role and performance trends.

8.6 Attrition Risk Monitoring

The AI-powered attrition risk module analyzes multiple signals to predict flight risk for each employee. Signals include: attendance patterns, engagement scores, compensation benchmark gaps, time since last promotion, and survey sentiment. To monitor attrition risk:

Step 1: Navigate to Performance > Attrition Risk Dashboard.

Step 2: Employees are categorized as: Low Risk (green), Medium Risk (yellow), High Risk (red).

Step 3: Click on any employee to view the risk breakdown and contributing factors.

Step 4: Use the "Retention Action" button to create a plan for high-risk employees.

8.7 Retention Action Plans

Step 1: From the Attrition Risk Dashboard, click "Create Retention Action" for a high-risk employee.

Step 2: Select from suggested actions: Compensation Review, Role Change, Mentorship Program, or Flexible Work Arrangement.

Step 3: Assign an action owner and set a follow-up date.

Step 4: Click "Save." The action is tracked until completion and the employee risk score is re-evaluated periodically.

8.8 Performance Rating Scale

AI-HRMS uses a 1-5 rating scale for performance evaluations:

Rating	Label	Description
1	Needs Improvement	Performance significantly below expectations
2	Below Expectations	Performance does not consistently meet expectations
3	Meets Expectations	Performance consistently meets role requirements
4	Exceeds Expectations	Performance regularly surpasses expectations
5	Outstanding	Exceptional performance with significant impact

9. Learning & Development

9.1 Browsing Course Catalog

Step 1: Navigate to Learning & Development > Course Catalog.

Step 2: Browse courses by category: Technical Skills, Leadership, Compliance, Soft Skills, or Domain-Specific.

Step 3: Use the search bar to find courses by keyword.

Step 4: Filter by format (Self-Paced, Instructor-Led, Blended), duration, and skill level.

Step 5: Click on a course card to view details: description, objectives, duration, and prerequisites.

9.2 Enrolling in Courses

Step 1: From the course detail page, click "Enroll."

Step 2: For instructor-led courses, select a batch/schedule from available options.

Step 3: If manager approval is required, the enrollment request is sent to your manager.

Step 4: Once approved, the course appears in your "My Learning" dashboard.

9.3 AI-Recommended Learning Paths

The AI engine analyzes your role, skill gaps, career aspirations, and performance reviews to recommend personalized learning paths. To access recommendations:

Step 1: Navigate to Learning & Development > My Recommendations.

Step 2: The AI displays a ranked list of courses and learning paths tailored to your profile.

Step 3: Each recommendation includes a reason: "Bridges skill gap in X," "Required for Y certification," or "Popular among peers in your role."

Step 4: Click "Start Learning Path" to enroll in all courses within a recommended path, or enroll in individual courses.

9.4 Tracking Course Progress

Step 1: Navigate to Learning & Development > My Learning.

Step 2: Active courses show progress as a percentage bar.

Step 3: Click on a course to resume where you left off.

Step 4: Completed courses show the completion date and score (if applicable).

Step 5: Managers can view team learning progress under Learning & Development > Team Progress.

9.5 Skill Inventory and Gap Analysis

Step 1: Navigate to Learning & Development > Skill Inventory.

Step 2: The skill inventory lists all skills defined for your role along with your current proficiency level.

Step 3: Skills are rated: Beginner, Intermediate, Advanced, or Expert.

Step 4: The Gap Analysis column highlights skills where your proficiency is below the expected level for your role.

Step 5: Click "Recommend Courses" next to a gap skill to see AI-suggested courses.

9.6 Certification Tracking

Step 1: Navigate to Learning & Development > Certifications.

Step 2: View your active certifications, expiration dates, and renewal requirements.

Step 3: Click "Add External Certification" to record a certification earned outside the system.

Step 4: Upload the certificate file and enter the valid-from and valid-to dates.

Step 5: The system sends reminders 60, 30, and 7 days before a certification expires.

9.7 Skill Gap Radar Chart Interpretation

The Skill Gap Radar Chart visually compares your current skill proficiency against the expected proficiency for your role. Each axis represents a skill area. The inner polygon (your current level) is compared against the outer polygon (expected level). Larger gaps between the two polygons indicate areas needing development. The chart is color-coded: green for skills meeting or exceeding expectations, yellow for moderate gaps, and red for significant gaps. Use this chart to prioritize your learning efforts.

10. Analytics & Reporting

10.1 Dashboard Analytics Overview

Step 1: Navigate to Analytics > Dashboard.

Step 2: The analytics dashboard provides interactive visualizations across key HR metrics.

Step 3: Use the time range selector to view data for the current month, quarter, or year.

Step 4: Filter by department, location, or employee category using the filter panel.

Step 5: Hover over any chart element for detailed tooltips with numbers and percentages.

10.2 AI-Powered Forecasts

The AI analytics engine generates predictive forecasts based on historical data. Available forecasts include:

- **Headcount Forecast:** Projected workforce size for the next 6-12 months based on hiring plans, expected attrition, and budget.
- **Cost Forecast:** Projected labor costs including salary increases, new hires, and benefit changes.
- **Attrition Forecast:** Predicted employee departures with confidence intervals.

Note: AI forecasts are updated weekly. The confidence level is displayed alongside each prediction. Forecasts become more accurate as more historical data is available in the system.

10.3 Attrition Prediction Reports

Step 1: Navigate to Analytics > Attrition Prediction.

Step 2: The report displays department-wise attrition rates (actual vs. predicted).

Step 3: The "At-Risk Employees" tab lists individuals with high attrition probability.

Step 4: Click "Generate Report" to create a detailed PDF with contributing factors and recommendations.

Step 5: Schedule the report for automatic generation (weekly or monthly) by clicking "Schedule Report."

10.4 Salary Benchmarking

Step 1: Navigate to Analytics > Salary Benchmarking.

Step 2: Select the benchmark source: Industry average, Regional market data, or Custom benchmark data.

Step 3: The system compares your organization salary data against the selected benchmark.

Step 4: Results show: percentile position, median comparison, and employees below market rate.

Step 5: Use the data to make compensation adjustment recommendations.

10.5 Custom Report Builder

Step 1: Navigate to Analytics > Custom Reports.

Step 2: Click "Create New Report."

Step 3: Select the data source module (e.g., Core HR, Payroll, Performance).

Step 4: Choose the fields to include by dragging them from the available fields list.

Step 5: Apply filters and groupings as needed.

Step 6: Select the visualization type: Table, Bar Chart, Line Chart, or Pie Chart.

Step 7: Click "Generate Report" to preview.

Step 8: Save the report template for future use by clicking "Save Template."

10.6 Exporting Reports

Any report in the Analytics module can be exported in the following formats:

- **PDF:** Formatted report with charts and tables, suitable for presentations.
- **Excel (XLSX):** Raw data with formatting, suitable for further analysis.
- **CSV:** Plain-text data export for integration with other tools.

To export, click the "Export" button on any report page and select the desired format.

10.7 Department-Wise Analytics

Step 1: Navigate to Analytics > Department Analytics.

Step 2: Select a department from the dropdown to view its analytics snapshot.

Step 3: Metrics include: Headcount, Attrition Rate, Average Tenure, Open Positions, Training Hours, and Average Performance Rating.

Step 4: Compare multiple departments side-by-side using the comparison view.

11. Employee Self-Service & Collaboration

11.1 Quick Actions

The Quick Actions menu on the dashboard provides one-click access to frequently used tasks:

- Apply Leave
- Submit Expense
- View Payslip
- Update Profile
- Browse Courses
- Raise Ticket

Click any quick action tile to be taken directly to the relevant form or page.

11.2 Profile Management

Step 1: Click your avatar in the top-right header, then select "My Profile."

Step 2: View and edit your personal information: contact details, address, emergency contacts.

Step 3: Update your profile photo by clicking the camera icon on your avatar.

Step 4: Change your password under the "Security" tab.

Step 5: Configure your notification preferences (email, in-app, or both) under the "Notifications" tab.

Note: Certain fields such as designation, department, and reporting manager are managed by HR and cannot be edited by the employee.

11.3 Viewing Payslips

Step 1: Navigate to Self-Service > My Payslips.

Step 2: Select the desired month from the list.

Step 3: Click "View" to see the salary breakdown online.

Step 4: Click "Download PDF" to save the payslip locally.

Note: Payslips are available from your joining date. Payslips older than 24 months can be accessed through the archive section.

11.4 Accessing Company Policies

Step 1: Navigate to Self-Service > Company Policies.

Step 2: Browse policies by category: HR Policies, IT Policies, Leave Policies, Code of Conduct, or Data Security.

Step 3: Click on a policy document to view it.

Step 4: Some policies require acknowledgment. Click "I Acknowledge" after reading.

11.5 AI HR Chatbot Usage

Step 1: Click the chat bubble icon in the bottom-right corner of any page to open the AI HR Chatbot.

Step 2: Type your question in natural language (e.g., "How many casual leaves do I have left?" or "What is the leave policy for new employees?").

Step 3: The chatbot responds instantly with relevant information drawn from HR policies and your personal data.

Step 4: For complex queries, the chatbot can create a support ticket or route your question to the appropriate HR team member.

Step 5: Chat history is saved and accessible from the chatbot window.

Note: The AI HR Chatbot is available 24/7 and handles common queries about leave, policies, payslips, and benefits. For sensitive matters, it will direct you to an HR representative.

11.6 Document Requests

Step 1: Navigate to Self-Service > Document Requests.

Step 2: Click "Request Document" and select the document type: Employment Certificate, Salary Certificate, Experience Letter, or Address Proof.

Step 3: Enter any specific details required (e.g., purpose, address for mailing).

Step 4: Click "Submit Request." The request is routed to HR for processing.

Step 5: Once approved, you will be notified and can download the document from the same page.

12. Role-Based Procedures

This section consolidates key procedures by role for quick reference. Each role has specific system permissions and workflows as defined by the RBAC system.

12.1 Super Admin Procedures

- Manage system configuration and global settings
- Create, modify, and deactivate user accounts across all roles
- Define and modify the RBAC permission matrix
- Monitor system-wide audit trails and security dashboards
- Configure approval workflows for all modules
- Manage integrations with third-party systems (biometric, payroll bank feeds)
- Override any approval or workflow in exceptional circumstances
- Access all data without masking restrictions

12.2 HR Admin Procedures

- Add, edit, and manage employee records and lifecycle transitions
- Configure leave policies, holiday calendars, and shift schedules
- Process monthly payroll and generate statutory compliance reports
- Manage job postings and oversee the recruitment pipeline
- Configure and monitor performance review cycles
- Set up L&D courses, learning paths, and skill frameworks
- Process document requests and generate employment certificates
- View and export all HR analytics and reports

12.3 Department Manager Procedures

- View and manage team attendance and leave approvals
- Conduct performance reviews for team members

- Set team OKRs and cascade department objectives
- Approve expense claims and travel requests
- Monitor team attrition risk and create retention actions
- Review team learning progress and assign mandatory courses
- Participate in interview panels for hiring within the department

12.4 Employee Procedures

- Mark attendance (check-in / check-out) daily
- Apply for leave and view leave balance
- Submit expense claims with receipts
- Complete self-reviews and provide peer feedback during review cycles
- Set and track personal OKRs
- Browse and enroll in L&D courses
- View payslips and submit tax declarations
- Use the AI HR Chatbot for quick queries

12.5 Recruiter Procedures

- Create and publish job postings
- Manage the candidate pipeline on the Kanban board
- Review AI Fit Scores and shortlist candidates
- Schedule and coordinate interviews
- Collect interview feedback and advance candidates through stages
- Manage the talent pool and re-engage past candidates
- Generate recruitment analytics reports

12.6 L&D Manager Procedures

- Create and manage course content in the LMS
- Design learning paths aligned with organizational skill requirements
- Define the skill framework and proficiency levels for each role
- Monitor organization-wide skill gap analysis
- Track certification compliance and expiration
- Review AI-recommended learning paths and adjust as needed
- Generate L&D analytics and training effectiveness reports

12.7 Payroll Specialist Procedures

- Process monthly payroll runs and verify calculations
- Manage salary structures, components, and revisions
- Configure tax slabs and statutory deduction rates
- Generate bank payment files for salary disbursement
- Produce statutory compliance reports (PF, ESI, TDS, Professional Tax)
- Process final settlements for exiting employees
- Reconcile payroll data with finance and audit

13. FAQ & Troubleshooting

13.1 Common Issues and Solutions

Issue	Solution
I cannot log in to the system.	1) Verify your email and password are correct. 2) Clear browser cache and cookies. 3) If your account is locked, wait 30 minutes and try again. 4) Use the "Forgot Password" link to reset. 5) Contact IT support if the issue persists.
I forgot to check in/out. What do I do?	Navigate to Time & Attendance > Regularisation. Submit a regularisation request with the correct check-in/out times. Your manager must approve the request.
My leave balance seems incorrect.	Leave balances update in real-time after approvals. Check the "Leave History" tab for deductions. If the balance still seems wrong, raise a ticket with HR.
I cannot view a colleague's profile.	Profile visibility depends on your role and the data masking policy. Employees can only view limited information of other employees. HR Admins have broader access.
My salary slip shows incorrect deductions.	First verify your tax declaration and investment proofs are up to date. If the issue persists, raise a ticket with the Payroll team. They can run a correction in the next payroll cycle.
The AI Fit Score seems inaccurate for a candidate.	AI Fit Scores are based on skills, experience, and job requirements defined in the posting. Review the job requirements and candidate profile for alignment. You can override the AI recommendation with manual judgment.
I cannot enroll in a course.	Some courses require manager approval. Check if your enrollment is pending approval. Other courses may have prerequisites. Verify you meet all requirements before enrolling.
The AI HR Chatbot is not responding.	Refresh the page and try again. If the chatbot is unavailable, submit a support ticket through Self-Service > Raise Ticket.

How do I change my reporting manager?	Reporting manager changes must be requested through HR. Navigate to Self-Service > Raise Ticket, select "Organizational Change" as the category, and provide the details.
A page is loading very slowly.	1) Check your internet connection speed. 2) Clear browser cache. 3) Try a different browser. 4) If the issue persists, contact IT support with the page URL and screenshot.

13.2 Contact Support

If you encounter an issue not covered in this SOP or the FAQ above, please contact the AI-HRMS support team through any of the following channels:

Channel	Details	Response Time
In-App Ticket	Self-Service > Raise Ticket	4 business hours
AI HR Chatbot	Click chat bubble (bottom-right)	Instant for common queries
Email Support	hrms-support@yourcompany.com	8 business hours
Phone Support	+1-800-HRMS-HELP (ext. 2)	2 business hours (critical issues)

When contacting support, please provide: your employee ID, the module/page where the issue occurred, a description of the problem, and any error messages or screenshots. Critical issues affecting payroll or data security are prioritized.
