1. Getting Started

1.1 Purpose

This section provides first-time users with the foundational knowledge required to log in, navigate, and begin using the AI-HRMS Smart Workspace platform effectively.

1.2 System Requirements

Requirement	Specification
Browser	Chrome 90+, Firefox 88+, Safari 15+, Edge 90+
Screen Resolution	Minimum 1280x720; recommended 1920x1080
Mobile	iOS 15+ / Android 12+ (responsive web app)
Network	Stable internet connection (minimum 2 Mbps)

1.3 Login Procedure

1. Open your web browser and navigate to the AI-HRMS URL provided by your organization.
2. On the login screen, enter your **corporate email address** in the Email field.
3. Enter your **password** in the Password field. Your initial password is sent to your corporate email by the HR Admin upon onboarding.
4. Click the **Sign In** button.
5. If Multi-Factor Authentication (MFA) is enabled for your account, enter the 6-digit code from your authenticator app.
6. Upon first login, you will be prompted to **change your password**. Enter your current password, then your new password (minimum 12 characters, must include uppercase, lowercase, number, and special character).
7. After changing your password, you will be redirected to the **Dashboard**.

Security Note: *Never share your credentials. If you suspect unauthorized access, immediately contact IT Support and change your password.*

1.4 Navigation Overview

Sidebar (Left Panel): Contains navigation links to all 10 modules, a search bar to filter modules, the Settings button, and the Logout button. The sidebar can be collapsed by clicking the Collapse button. On mobile devices, the sidebar opens as a slide-out drawer via the hamburger menu.

Main Content Area (Center): Displays the active module content, including data tables, forms, charts, and action buttons.

User Profile (Sidebar Footer): Shows your name, role, and avatar. Click to view your profile details.

Notification Bell: Located in the sidebar header; displays a count badge for unread notifications.

AI Badge: Modules with AI-powered features display a green AI badge next to their name in the sidebar.

2. Module 1: Dashboard

2.1 Purpose and Scope

The Dashboard module serves as the central command center for the AI-HRMS platform. It provides a high-level overview of key HR metrics, live trends, AI-driven attrition predictions, recent activities, and pending approvals - all in real time. The Dashboard is the default landing page after login.

2.2 Access by Role

Role	Access Level
Super Admin	Full dashboard with all widgets and data
HR Admin	Full dashboard with all widgets and data
Payroll Specialist	Payroll and attendance widgets only
Department Manager	Department-specific data and pending approvals
Employee	Limited personal summary (leave balance, payslips)
Recruiter	Recruitment-specific widgets
L&D; Manager	Training and skill-related widgets

2.3 Step-by-Step Procedures

2.3.1 Viewing Key Statistics

1. After login, the Dashboard loads automatically. If on another module, click Dashboard in the sidebar.
2. The top row displays four stat cards: Total Employees, Active Positions, Attendance Rate, and Monthly Payroll.
3. Each card shows the current value, a trend indicator, and a contextual change message.
4. Hover over any card to see it highlighted with a colored accent bar at the bottom.

2.3.2 Reviewing Charts

The Dashboard features three key charts:

Headcount Trend Chart: An area chart displaying monthly headcount over the past 12 months.

Department Distribution Chart: A donut chart showing employee distribution across departments.

AI Attrition Predictions Chart: A grouped bar chart comparing predicted risk vs. actual attrition by department. This chart carries the AI badge.

2.3.3 Using Quick Actions

Locate the Quick Actions card below the charts. Click any action button (e.g., "Add Employee," "Process Payroll," "Post Job," "Run Reports," "Schedule Interview," "Approve Leaves") to navigate directly to the relevant module.

2.3.4 Reviewing Pending Approvals

Locate the Pending Approvals card in the bottom row. Each item displays the employee name, request type, details, and an approve button. Click the checkmark icon to approve inline, or click the item for full details.

2.4 UI Descriptions

UI Element	Description
Stat Cards	Four rectangular cards in a horizontal row, each with icon, metric value, and trend indicator
Headcount Trend	Green area chart with gradient fill, interactive tooltips
Department Distribution	Donut chart with color-coded legend at the bottom
AI Attrition Predictions	Dual-bar chart with amber (predicted) and green (actual) bars
Quick Actions	Grid of outlined buttons with icons; hover turns border emerald
Recent Activities	Scrollable list with icons, description text, and timestamps
Pending Approvals	Scrollable list with request details and inline approve button
Live Badge	A pulsing green dot labeled "Live" in the header indicating real-time data

2.5 Common Scenarios

Scenario	Action
Dashboard not loading data	Check network connection and refresh. Clear browser cache or try a different browser.

Scenario	Action
Need to approve multiple leaves quickly	Use Pending Approvals section on Dashboard to approve inline.
Want a quick overview before a meeting	Check stat cards and AI Attrition Predictions for a 30-second summary.

2.6 Troubleshooting Tips

Charts not rendering: Ensure JavaScript is enabled. Check for browser extensions that may block chart rendering.

Stale data displayed: Click the browser refresh button or press Ctrl+F5 for a hard refresh. Dashboard data may cache for up to 60 seconds.

Pending approvals count mismatch: Pending approvals are role-specific. If you recently delegated approval authority, items may no longer appear for your role.

2.7 Best Practices

Review the Dashboard at the start of each workday to stay informed on organizational metrics and pending items.

Use Quick Actions to reduce navigation time for frequent tasks.

Monitor the AI Attrition Predictions weekly and escalate high-risk departments to HR leadership proactively.

3. Module 2: Employee Management

3.1 Purpose and Scope

The Employee Management module is the central repository for all employee data. It includes the employee database, organizational chart, document management, and asset tracking. This module enables HR personnel to manage the full employee lifecycle from onboarding to offboarding.

3.2 Access by Role

Role	Access Level
Super Admin	Full CRUD on all employees, org chart, documents, assets
HR Admin	Full CRUD on all employees, org chart, documents, assets
Department Manager	View and edit own department employees; view org chart

Role	Access Level
Employee	View own profile only (redirects to Self-Service)
Payroll Specialist	View employee compensation data (read-only)
Recruiter	View employee directory (read-only)
L&D; Manager	View employee skills and training records

3.3 Step-by-Step Procedures

3.3.1 Adding a New Employee

1. Navigate to Employees in the sidebar.
2. Click the Add Employee button (top-right of the employee list).
3. Fill in the required fields: First Name, Last Name, Email, Phone, Department, Designation, Job Title, Join Date, Employment Type, Location, Work Mode, Reporting Manager.
4. Click Save to create the employee record.
5. The system sends a welcome email to the new employee with login credentials.

3.3.2 Viewing the Organization Chart

1. Navigate to Employees and click the Org Chart tab.
2. The org chart renders as an interactive tree diagram with nodes representing employees.
3. Click a node to expand/collapse the subtree under that manager.
4. Hover over a node to see a tooltip with employee details (name, designation, department).

3.3.3 Managing Employee Documents

1. Open an employee profile by clicking their row in the employee list.
2. Navigate to the Documents tab within the profile.
3. Click Upload Document to add a new document.
4. Select the document type, then choose the file from your device.
5. Click Upload. The document appears in the list with type, upload date, and download button.

3.3.4 Assigning Assets to Employees

1. Open the employee profile and navigate to the Assets tab.
2. Click Assign Asset.
3. Fill in the asset details: Asset Name, Type, Serial Number, Condition.
4. Click Assign. The asset is now linked to the employee record.

3.4 Common Scenarios

Scenario	Action
Employee transfers to another department	Edit the employee profile, update Department and Reporting Manager fields. The org chart updates automatically.
Employee resigns	Change status to "Inactive," set last working day, initiate offboarding checklist. Recover all assigned assets.
Document expires (e.g., work visa)	Set an expiry date when uploading. The system generates alerts 30/15/7 days before expiry.

3.5 Best Practices

Always assign a Reporting Manager when creating an employee to ensure org chart integrity.

Upload all onboarding documents within the first 3 days of joining.

Conduct quarterly asset audits to verify physical assets match system records.

4. Module 3: RBAC and Security

4.1 Purpose and Scope

The Role-Based Access Control (RBAC) and Security module manages user roles, permissions, audit trails, and data security policies. It ensures that every user accesses only the data and features appropriate to their role, maintaining compliance and data protection standards.

4.2 Access by Role

Role	Access Level
Super Admin	Full access: create/edit roles, assign permissions, view audit trails, configure security policies
HR Admin	View roles and audit trails; request permission changes from Super Admin
All other roles	No direct access to this module

4.3 Step-by-Step Procedures

4.3.1 Creating a New Role

1. Navigate to RBAC and Security in the sidebar.
2. Click the Roles tab.
3. Click Create Role.
4. Enter the Role Name and Description.

5. Set the Access Level (0-4, where 0 is highest privilege).
6. Select the permissions to grant by toggling each permission checkbox.
7. Click Save Role.

4.3.2 Viewing Audit Trails

1. Navigate to the Audit Trails tab.
2. Use the filters: Date Range, User, Action Type, Module.
3. Click Apply Filters to load the results.
4. Each audit entry shows: Timestamp, User, Action, Module, Affected Record ID, and IP Address.
5. Click Export to download the audit trail as a CSV file.

4.4 Best Practices

Follow the principle of least privilege: assign the minimum permissions required for each role.

Review role assignments quarterly and remove unnecessary access.

Enable MFA for all admin-level accounts (Level 0 and Level 1).

Export audit trails monthly and archive them per your organization data retention policy.

5. Module 4: AI Talent Acquisition

5.1 Purpose and Scope

The AI Talent Acquisition module streamlines the entire recruitment lifecycle - from job posting and candidate sourcing to pipeline management and AI-powered onboarding. AI features include candidate fit scoring, resume matching, interview question generation, and a compliance chatbot for onboarding.

5.2 Access by Role

Role	Access Level
Super Admin	Full access to all talent acquisition features
HR Admin	Full access to all talent acquisition features
Recruiter	Full access to job postings, candidate pipeline, onboarding
Department Manager	View candidates for own department; approve hiring requests
Employee	No access (referrals submitted via Self-Service)
Payroll Specialist	No access
L&D; Manager	View onboarding training assignments

5.3 Step-by-Step Procedures

5.3.1 Posting a New Job

1. Navigate to Talent Acquisition in the sidebar.
2. The module opens with three tabs: Job Postings, Candidate Pipeline, and AI Onboarding.
3. On the Job Postings tab, click Post New Job.
4. Fill in the job posting form: Job Title, Department, Location, Employment Type, Experience, Salary Range, Required Skills, Job Description.
5. Click Publish Job to make the posting live.

5.3.2 Managing the Candidate Pipeline (Kanban)

Switch to the Candidate Pipeline tab. The pipeline displays as a horizontal Kanban board with six columns: Applied, Screening, Interview, Offered, Hired, and Rejected. Each candidate card shows Name, Current Company, Experience, Skills, Source Badge, and the AI Fit Score gauge (green ≥ 75 , amber ≥ 50 , red < 50). Click a candidate card to open the Candidate Detail Dialog with AI Resume Match Analysis and AI-Generated Interview Questions.

5.3.3 Using the AI Onboarding Assistant

Switch to the AI Onboarding tab. View onboarding progress for new hires with a checklist. Use the AI Compliance Bot (floating chat panel) to ask questions such as "What documents are pending?" or "Check IT setup status." The bot provides real-time compliance status and recommendations.

5.4 Best Practices

Always include comprehensive required skills when posting a job; the AI matching quality depends on the specificity of the job requirements.

Review AI-generated interview questions before sharing them with candidates; customize them to fit your team evaluation criteria.

Use the onboarding checklist consistently to ensure no compliance steps are missed for new hires.

Update the pipeline status promptly after each candidate interaction to maintain accurate recruitment analytics.

6. Module 5: Time and Attendance

6.1 Purpose and Scope

The Time and Attendance module handles daily attendance tracking, leave management, shift scheduling, and geofencing for location-based attendance. It ensures accurate time records for payroll processing and compliance with labor regulations.

6.2 Key Procedures

6.2.1 Clocking In/Out

Navigate to Time and Attendance in the sidebar. On the Attendance tab, click the Clock In button when starting work. If geofencing is enabled, the system prompts for location permission. A green confirmation toast appears with your clock-in time. At the end of the workday, click Clock Out.

6.2.2 Applying for Leave

Navigate to Time and Attendance, then Leave Management tab. Click Apply Leave. Fill in the form: Leave Type (Earned Leave, Casual Leave, Sick Leave, Comp Off, Loss of Pay), From Date and To Date, Reason, and Contact During Leave. Click Submit. The leave request is sent to your Reporting Manager for approval. Track the status: Pending then Approved/Rejected.

6.2.3 Managing Shifts

Navigate to the Shifts tab. View the current shift roster in a calendar or list format. To assign a shift, click Assign Shift, select the employee(s), and choose the shift template (Morning 6AM-2PM, General 9AM-6PM, Evening 2PM-10PM, Night 10PM-6AM). Click Save.

6.3 Best Practices

Clock in and out at the designated times to maintain accurate attendance records.

Apply for leaves at least 3 days in advance (except Sick Leave) to allow managers to plan coverage.

Review and approve leave requests within 24 hours to maintain employee trust and operational continuity.

Audit geofence configurations quarterly to ensure they match current office locations.

7. Module 6: Payroll and Expenses

7.1 Purpose and Scope

The Payroll and Expenses module handles end-to-end payroll processing, expense claim submissions and approvals, and tax declarations. It integrates with attendance data to compute accurate compensation and supports multi-component salary structures.

7.2 Key Procedures

7.2.1 Processing Payroll

1. Navigate to Payroll and Expenses in the sidebar.
2. On the Payroll tab, select the payroll month and year.
3. Review the employee payroll summary: gross salary, deductions (PF, ESI, TDS, Professional Tax), and net pay.
4. Click Run Payroll to initiate the payroll calculation.
5. Review the payroll register for accuracy. Flag any discrepancies for manual correction.
6. Click Approve and Process to finalize. The system generates payslips and sends them to employee emails.

7.2.2 Submitting an Expense Claim

Navigate to the Expenses tab. Click Submit Expense. Fill in the form: Expense Category (Travel, Equipment, Meals, Training, Other), Amount, Date of Expense, Description, and Receipt Upload (max 5 MB). Click Submit. The claim is routed to the Reporting Manager for approval. Track the status: Pending then Manager Approved then Finance Approved then Reimbursed.

7.3 Best Practices

- Process payroll by the 25th of each month to ensure payslips are distributed before month-end.
- Submit expense claims within 7 days of the expense date to avoid rejections.
- File tax declarations proactively at the start of the financial year to optimize monthly TDS.

8. Module 7: Performance and Talent

8.1 Purpose and Scope

The Performance and Talent module manages performance review cycles, OKR (Objectives and Key Results) tracking, and AI-powered attrition analysis. It enables continuous feedback, structured reviews, and data-driven talent retention strategies.

8.2 Key Procedures

8.2.1 Initiating a Performance Review Cycle

Navigate to Performance in the sidebar. On the Reviews tab, click Create Review Cycle. Enter the cycle name, start date, end date, and review type (360, Manager-Only, Self+Manager). Select the departments and employees. Configure the rating scale (1-5 or 1-10). Click Publish. Invited employees and managers receive notifications.

8.2.2 Setting OKRs

Navigate to the OKRs tab. Click Add Objective. Enter the Objective and add 2-5 Key Results with measurable targets. Assign the OKR to yourself or a team member. Set the quarter and alignment (company-level, department-level, individual). Click Save. Managers approve objectives before they become active.

8.2.3 Using AI Attrition Analysis

Navigate to the AI Attrition tab. The dashboard displays department-wise attrition risk scores, comparison with actual attrition, and key risk factors. Click a department to drill down into individual employee risk profiles. Review AI-suggested retention actions. Export the attrition risk report for leadership review.

8.3 Best Practices

- Conduct performance reviews at least twice a year (mid-year and annual).

- Set OKRs at the beginning of each quarter with measurable, time-bound key results.

- Review AI attrition predictions monthly and act on high-risk cases within 14 days.

- Encourage a culture of continuous feedback rather than relying solely on formal review cycles.

9. Module 8: Learning and Development

9.1 Purpose and Scope

The Learning and Development (L&D;) module manages the corporate course catalog, learning paths, skill inventory, and AI-driven training recommendations. It supports both self-directed and assigned learning to close skill gaps and accelerate professional growth.

9.2 Key Procedures

9.2.1 Creating a Course

Navigate to Learning and Development in the sidebar. On the Course Catalog tab, click Create Course. Fill in the details: Course Title, Category (Technical, Leadership, Compliance, Soft Skills), Duration, Format (Self-paced, Instructor-led, Blended), Description, Learning Objectives, and Skills Covered. Upload course materials and configure assessments. Click Publish.

9.2.2 Creating a Learning Path

Navigate to the Learning Paths tab. Click Create Learning Path. Enter the path name, description, and target role/department. Add courses in the desired sequence. Set prerequisites between courses if needed. Assign the learning path to employees or departments. Click Publish.

9.2.3 Managing the Skill Inventory

Navigate to the Skill Inventory tab. View a matrix of employees and their skill proficiency levels (Beginner, Intermediate, Advanced, Expert). Filter by department, skill category, or proficiency level. Identify skill gaps. Click Recommend Training to auto-suggest courses (AI-powered).

9.3 Best Practices

Update the course catalog quarterly to include emerging technologies and updated compliance requirements.

Map every learning path to specific OKRs to demonstrate ROI on training investments.

Encourage employees to self-assess their skill proficiency at least twice a year to keep the inventory current.

10. Module 9: Analytics and Reporting

10.1 Purpose and Scope

The Analytics and Reporting module provides real-time dashboards, predictive analytics powered by AI, and custom report generation. It enables data-driven decision-making across all HR functions by consolidating data from every module into unified views.

10.2 Key Procedures

10.2.1 Viewing Real-Time Dashboards

Navigate to Analytics and Reporting in the sidebar. Select a dashboard from the left panel: HR Overview, Recruitment, Attrition, Payroll, Learning, or Attendance. Each dashboard features interactive charts and KPI cards. Use the date range selector and department filter to narrow the view.

10.2.2 Using Predictive Analytics

Navigate to the Predictive Analytics tab. Available predictions include: Attrition Risk, Headcount Forecast, Time-to-Hire Projection, and Training Completion Forecast. Select a prediction model, configure parameters, and click Run Prediction. The AI model generates forecasts with confidence intervals.

10.2.3 Creating Custom Reports

Navigate to the Custom Reports tab. Click Create Report. Select data source modules, choose fields, apply filters, select the output format (Table, Bar Chart, Line Chart, Pie Chart). Click Generate to preview, then Export to download as PDF, Excel, or CSV.

11. Module 10: Employee Self-Service

11.1 Purpose and Scope

The Employee Self-Service module provides employees with a centralized portal to view and manage their personal information, request time off, submit expenses, access payslips, and interact with the AI-powered HR assistant chatbot for instant answers to policy and procedure questions.

11.2 Key Features

Profile Management: View and update personal details, emergency contacts, and bank information.

Leave Requests: Apply for leave, view leave balance, and track approval status.

Expense Submission: Submit expense claims with receipt uploads and track reimbursement status.

Payslip Access: View and download monthly payslips.

AI Chat Assistant: Ask HR-related questions and receive instant, context-aware responses.

Document Access: View and download personal documents (offer letters, certificates).

Training Enrollment: Browse course catalog and enroll in learning programs.

12. Glossary of Terms

Term	Definition
AI Fit Score	A 0-100 score calculated by AI to assess candidate-job compatibility

Term	Definition
HRMS	Human Resource Management System
Kanban	A visual workflow management method using columns to represent process stages
MFA	Multi-Factor Authentication - requires two or more verification methods
OKR	Objectives and Key Results - a goal-setting framework
RBAC	Role-Based Access Control - restricts system access based on user roles
SOP	Standard Operating Procedure - a set of step-by-step instructions for routine operations
CTC	Cost to Company - total salary package including all components
PF	Provident Fund - a retirement savings scheme
ESI	Employee State Insurance - a social security scheme
TDS	Tax Deducted at Source - advance tax collected on income

13. Frequently Asked Questions

Q: How do I reset my password?

A: Click "Forgot Password" on the login screen. Enter your corporate email. A reset link will be sent to your inbox. If you do not receive the email within 5 minutes, contact IT Support.

Q: Can I access AI-HRMS from my mobile device?

A: Yes. AI-HRMS is a responsive web app. Open your mobile browser and navigate to the same URL. The interface adapts to smaller screens automatically.

Q: What should I do if I see incorrect data on the Dashboard?

A: Dashboard data refreshes every 60 seconds. Try a hard refresh (Ctrl+F5). If the data is still incorrect, raise a support ticket through the Self-Service module or contact HR.

Q: How do I apply for leave retroactively?

A: Retroactive leave applications are allowed for Sick Leave only, within 2 working days. Navigate to Time and Attendance, then Leave Management, and select the past dates.

Q: Who should I contact for payroll issues?

A: Contact your Payroll Specialist or HR Admin. You can also use the AI Chat Assistant in the Self-Service module for general payroll queries.

14. Contact and Support

Support Channel	Contact
